

Floor-geometry calibration board

7 x 5 squares of 25.0 mm -- 6 x 4 interior corners for findChessboardCorners

PRINT AT 100% / ACTUAL SIZE. Do not use "fit to page" or "shrink to fit".

This line is exactly 100 mm. Measure it. If it is not, the squares are not 25.0 mm either.

Lay flat on the floor, squares facing up, near edge about 12 cm ahead of the lens.

Keep the whole board in frame and unshadowed; it does not need to be square to the robot.
